Cut Flowers, Designs, Plants, Seeds, Trees and Shrubs

LANDSCAPE SERVICE

Astoria - Illinois
INTRODUCTION

In presenting this catalogue, we desire to extend our thanks for the past patronage of our many customers, and to solicit your orders for the future. Our right to existence is based upon our service and no order is too large or too small to receive our careful attention.

We are always glad to consult with prospective customers and give them suggestions based upon personal knowledge of what others have found the most profitable and satisfactory under similar circumstances.

In common with other merchandise, the general trend of prices for both fruit and ornamental stock is upward, which is made necessary by the increased cost of labor, material and general expense of operation. We strongly recommend that you buy NOW whatever you contemplate planting. They will be no cheaper in cost in the future, and you will have that much more time to enjoy the satisfaction which comes from planting, and it is not well to lose sight of the fact that we will be dead a long time after we leave this earth, and satisfaction now is better than the anticipated satisfaction of someone else. For commercial returns, the early bird gets the worm and while there seems no possible failure of the fruit demand for the future, yet the quicker you get your plants into bearing, and learn to properly market them, the greater your advantage over those who plant next year or "after a while."

In the nursery trade there has grown up a standard of ethics which is observed by all reputable nurserymen and you are respectfully referred to these terms and conditions when placing your orders.

We feel confident that all things considered, we can supply your wants better than anyone else, because of our knowledge of local problems you have to meet.

THE SHIPPING SEASON generally begins from the first to the middle of April and about the 15th of October in the autumn. The season is not regulated, however, by any definite date, nor by the state of vegetation at the locality of the planter, but by the condition of the trees when received. Parties south of us may receive our trees some weeks after their season has opened, yet when planted they will give entire satisfaction.

EARLY ORDERS—To one familiar with the rush at the packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders are received far enough ahead of the packing season with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—place your order as far in advance of shipping as you possibly can, stating when you would like stock sent.

PACKING—We do not charge for packing, boxing or delivering to freight or express companies at our station. We do not prepay any charges, unless goods are to be delivered at a prepay station, as all our prices and quotations are free on board cars at our nurseries. If you have no agent at your station and shipment has to be prepaid, notify us and we will prepay and bill the charges to you after shipment.

TERMS—Cash, Money Order or Check with order. No C. O. D. shipments.

OUR GUARANTEE—We exercise care to have our stock genuine and reliable, and hereby guarantee that if all, substantially all or any part of stock delivered, does not prove true to name as ordered, we will replace it free of charge, or refund the money paid for it, that being the measure of damages for a breach of the contract.

Certificate of Nursery Inspection Furnished with All Shipments
The apple is universally recognized as the most desirable fruit of the United States, because of its great varieties of delicious flavors, nutritious qualities and nutritive value. Whether as commercial crop or for the satisfaction of the family, a well selected orchard of a few varieties is a most desirable investment for any land owner to place on his premises.

We recommend the planting of a few thrifty trees from one to three years old and from four to five feet high as such are more safely handled than older and larger trees.

**Summer Apples**

*Chenango (Strawberry)—Rather large, oblong conic, angular; whitish-yellow striped and splashed with light crimson; flesh white, very tender, with mild pleasant sub-acid flavor. A market and eating variety. Tree vigorous and productive.*

*Duchess of Oldenburg—Large size roundish; streaked with red and yellow; flesh whitish; juicy; flavor sprightly, sub-acid; market variety. Tree a vigorous grower; very hardy; succeeds in northwest where many kinds fail. August-September-October.*

*Early Harvest—Medium to large; pale yellow; fine flavor. Tree moderate, erect grower, and a good bearer. A beautiful and excellent variety for dessert and kitchen.*

*Golden Sweet—A large, handsome, yellow apple; fine; sweet; good for market. Tree rather spreading and irregular. A free grower and productive; August-September.*

*Red Astrachan—Large, roundish; nearly covered with deep crimson; overspread with a thick bloom, juicy, rich, acid, Cooking and eating variety, suitable for market. Tree a vigorous grower with large foliage; a good bearer. August.*

*Yellow Transparent—Good size; clear white turning to pale yellow; flavor sub-acid, highly prized for cooking and eating; popular market variety. Tree of Russian origin; upright grower; bears early and abundantly; hardy. July-August.*

**Fall Varieties**

*Fall Pippin—Very large, roundish, oblong, yellow; flesh tender and delicious. One of the most valuable varieties for table or market. Tree a free grower and a fine bearer. October-December.*

*Fameuse (Snow Apple)—Medium size; pale greenish-yellow, mixed with stripes of red and splashes of red on shady side; flesh white tender and juicy; slightly perfumed, sub-acid; extra good; recommended for table, kitchen and market. An old and well known variety. Tree a moderate grower but productive. October-November.*

*Hubbardston (Nonsuch)—Large, yellow with red stripes; flesh tender and juicy; sub-acid, very good flavor; recommended for dessert and market. Very productive. November-January.*
Maiden Blush—Medium size smooth, beautifully flushed with red on creamy yellow; flesh tender, of pleasant but not high flavor. A good market sort because of attractive appearance and all-around utility. Tree a fair grower and productive. September-October.

Rambo—Medium size; oblate; smooth streaked and marbled with dull yellowish ground; dots large, whitish; flesh tender, rich, mild, sub-acid. An old variety; good for cooking or eating. Tree a great grower and very productive. Most popular in the west. October-December.

Wealthy—Medium size; roundish smooth nearly covered with dark red; very good; dessert; very profitable as a market sort. Tree good grower and productive. October-January.

Winter Varieties

Baldwin—Medium size; conical bright red; flesh crisp, juicy, sub-acid; rich flavor; great market variety of eastern states for cooking, dessert and market. Tree vigorous. Open head. Abundant crops, but does not bear young. November-March.

Banana—Medium size; smooth; easily polished; deep yellow; slight blush; flesh solid, juicy; mild sub-acid; has delicate banana perfume and flavor; very popular for dessert and market.

Cortland—A derivation from McIntosh, adding distinct perfections to that already very perfect apple. The tree; hardy, thrifty, early producing and long lived. The fruits: abundant, large, round, and handsome; attractive to the eye with their heavy overlay of shaded reds; and delightful to the taste with their brittle texture, luscious juiciness, and sprightly flavor. Better than McIntosh, because the fruits hang tenaciously to the tree; they are two to four weeks later, thus correspondingly extending their keeping period; and they better withstand the wear and tear of going to market. All-in-all, a remarkably fine second season cropper for commercial orchards, equally good for cooking or dessert.

The New Cortland Apple
CRAB APPLES

Crab apples are especially desirable in the colder sections as only a few varieties of apples can be successfully grown; but they succeed well in all climates and their fruit is very popular for preserves, jelly and some sorts are excellent eating.

**Hyslop**—Large, round, conical; yellow, with heavy shadings of deep crimson and splashes of maroon with heavy blue bloom; flesh fine, firm, yellow, astringent; its high color always commands a fancy market price. Tree very vigorous and hardy; blights in some localities; bears abundantly; clusters, which make them exceedingly ornamental. September-October.

**Transcendent**—Medium, large, oblate; golden yellow with blush; flesh firm crisp, yellowish, fine grained, very juicy and acid; when ripe is edible. It is generally grown all over the United States and is very popular for cider as well as jelly and preserves. Tree grows rapid and irregular; a great bearer; subject to blight and should not be planted near other apple trees. Sept.

**Whitney**—Large, averaging one and one-half to two inches; round, conical; smooth, glossy yellow, with red stripes; flesh firm, juicy and ripe; almost sweet; especially bred for wine and cider. Tree hardy, handsome and very productive. August.

**Yellow Siberian**—Small, round; yellow; flesh yellowish and acid; popular on market for jellies. Tree vigorous and hardy.
The pear is the most delicious of modern fruits on account of its fine, juicy texture, exquisite flavor and aroma. While some varieties do better if picked when partially ripe and finished in doors, yet the really enjoyable supply should come from the home orchard, planting a number of varieties that will ripen in succession, from fall to winter. Some points in favor of pears are, they begin bearing in a very few years after planting; seldom miss bearing at least a partial crop, for which there is always a ready sale, besides they are one of the most healthful of our fruits.

**Summer Varieties**

**Bartlett**—Large; rich yellow, with beautiful blush next to the sun; buttery, very juicy and highly flavored. Very popular; grown everywhere. A favorite market variety. Tree a strong grower; bears early and abundantly. Does best as a standard. Last of August and early September.

**Clapp’s Favorite** (Fay)—Large; pale lemon yellow with red cheek; flesh of fine texture, melting buttery, juicy, with a rich vinous flavor; good for market and kitchen. Tree hardy and very productive, does well in all sections. Standard or dwarf. Aug.

**Seckel**—Medium; yellow, with crimson cheek; flesh melting, sweet and aromatic; most exquisitely flavored pear known. Tree slow grower, but hardy and healthy. Sept.

**Autumn Varieties**

**Anjou** (Buerre D’Anjou)—Large; greenish shaded with russet-crimson; flesh is highly flavored, vinous and rich; dessert and market sort; keeps well until winter holidays, when it commands a high price. Tree hardy and productive and succeeds well in all sections. October-January.

**Bosco**—Finest quality late fall and winter variety. Extra large, long and tapering; russet; good shipper, vigorous, brings highest market price. Our trees are all from virile new stock. Nov.-Dec.

**Clairgeau** (Buerre Clairgeau)—Large, yellow with russet and brown sometimes shaded with crimson, flesh yellow, juicy, recommended for cooking and market sort. Tree a very good grower and bears early. Standard or dwarf. October-November.

**Duchess** (Duchesse d’Angouleme)—Very juicy, with rich, excellent flavor. An all around variety for dessert, cooking and market. Succeeds best as a dwarf.
Duchess—Large; pale yellow, covered with light russet, turning reddish-brown when ripe, flesh juicy, very sweet, rich and melting; recommended for extreme northern states. Standard and dwarf. September.

Garber—Large; bright yellow, with red blush; flesh juicy and rich; a cross with the Kieffer, but two weeks earlier and better quality. Tree very productive and bears three years after planting. Standard. September.

Kieffer—Medium large; yellow and crimson, with russet and brown; flesh firm and good when ripe; the Ben Davis of the pear family; when properly ripened is delicious. Tree vigorous, with healthy, dark green foliage; an early bearer and very productive everywhere. October.

Worden (Worden’s Seckel)—Medium size; golden yellow, with russet cheek; flesh fine grained, juicy buttery with a rich aroma; recommended highly as a dessert and market sort. Tree hardy and an enormous bearer. September.

**Winter Varieties**

Drouard (President)—Very large; greenish-yellow and russet; very handsome; flesh melting, juicy and highly aromatic; recommended for dessert and market. Tree vigorous, healthy and prolific bearer. February-March.

Lawrence—Medium; lemon yellow, flesh sweet, melting, aromatic; recommended as one of the very best winter sorts. Tree hardy, healthy and productive. Either dwarf or standard. November-December.

Winter Nelis—Medium; greenish-yellow, with russet; flesh fine grained, melting and rich; considered one of the most delicious and best winter sorts. Tree straggly and slender grower, but hardy and thrifty. Standard or dwarf.

**QUINCES**

The Quince is always in demand, although its commercial value has changed but little for many years. Quinces are largely used in cooking, canning and preserving, as they have a delicious flavor. It is a reliable cropper, and requires but little care. Yet the increased size of the fruit and the quality repay well for all the extra work given them. The trees thrive in almost any soil, but prefer a heavy, moist, clay loam.

Angers—Medium size, pear shaped; golden yellow; rather acid, tree a thrifty grower and abundant bearer. October.

Champion—Very large, greenish-yellow, flesh cooks as tender as an apple and without hard spots or core; flavor delicate imparting an exquisite quince taste and odor to any fruit with which it is cooked. Trees are vigorous growers and bear heavy crops of superior fruit; one of the best for sections not subject to early frosts.

Orange—Large, bright golden yellow fine firm flesh and good flavor; one of the best for cooking. The most popular and extensively cultivated of the old varieties. Oct.

Reas Mammoth—Rich, orange color, roundish, pear shape, tapering neck. Very good quality for flavoring other fruits and for baking; almost fuzzless.

All our fruit trees, shrubs and vines are guaranteed to be true to name and if a mistake should be made will be glad to rectify.
Every home should have a few peach trees as there is no more delicious fruit in its season, and that purchased on the market is often of an inferior quality because of the necessities of picking comparatively green. Peach trees grow quickly but are of short life and to keep a good supply of fruit, a few trees should be set out each year to replace those that die of old age or accident.

**Beers Smock**—Medium large; creamy white, with crimson blush; flesh yellow, tender and rich, very good quality for the season and recommended for market. Tree a rapid grower, prolific bearer and hardy. Late September-October.

**Belle of Georgia**—Medium large, oblate; white, with red cheek; flesh white, firm and excellent flavor; recommended for dessert kitchen and market. Tree a rapid grower and very productive. Early July.

**Carman**—Large, round; white, with deep blush; flesh tender and juicy, with fine flavor; skin very tough, making it available for marketing with profit. Tree reported very hardy and a prolific bearer. August.

**Champion**—Large, round, quite regular; creamy yellow, with red blush; flesh white with red stains around pit; flavor delicious, sweet and juicy. Tree very hardy and productive. First of September.

**Crawford's Late**—Large, yellow or greenish-yellow, with dull red cheek; flesh yellow, stained red at pit melting, vinous and very good. Tree hardy and productive, usually needs thinning to make good size fruit. Last of September.

**Crawford's Early**—Large; yellow, with red cheek; flesh yellow, juicy and good; skin and beauty make it very popular. Tree vigorous and productive, but buds are very tender. First of September.

**Crosby**—Hardy in tree and bud. Golden orange color; firm but tender; very good quality; medium size. A good canner. Late.

**Dewey** (Admiral Dewey)—Medium size; yellow; flesh firm yellow and delicious; good shipper; highly recommended as a very early sort. Tree is strong, hardy, symmetrical grower and produces well. July.

**Ede** (Captain Ede)—Very large; yellow, tinted with red; flesh yellow and about same quality as Elberta; claimed to be harder than Elberta and as good a market sort. August-September.

**Early Elberta**—Ripens about a week earlier than Elberta; otherwise the same, or a trifle better quality.

**Elberta**—Very large; red blush; flesh yellow with pale yellow, tender and juicy; the great market peach of the country. Rank, vigorous grower, does well in all peach growing sections. Middle September.

**Greensboro**—Medium; yellow, with beautiful blush; flesh white, juicy and good; freestone when fully ripe; said to be larger than Alexander. July.

**Kalamazoo**—Medium to large; oval; yellow, striped with red and a thin bloom; flesh yellow, red at pit; rich, vinous and of good quality. Tree a strong grower and bears at two years old; hardy and reliable. September.

**Lemon Free**—Medium large, roundish; often with pointed apex; light yellow with greenish-white tinge and thick bloom; flesh yellow, tender and good; a good canning sort. Tree a regular and prolific bearer. October.
FRUIT DEPARTMENT

Salberta—Salway and Elberta, conserving the size, quality and productiveness of Elberta for the more profitable later picking due to Salway's influence. Two to three weeks later than Elberta, richly yellow and succulent, it is bound to briskly rival the Smock for market supremacy during the lateer's well established season.

Salway—Large, creamy yellow, red cheek, flesh deep yellow juicy rich, sweet. October.

St. John—Nearly as large as Crawford, fully equal in color. Fruit round, brilliant, showy: one of the earliest yellow peaches. August.

Stump—Very large, roundish; white, with a red cheek, considerable bloom; flesh white, juicy and good flavor. Tree very prolific. Last of September.

Wilma—The fruit is large as Elberta (its parent), not quite so elongated; color very much better, and ripens about ten days later. Its more attractive color outsells Elberta when side-by-side on the market.

PLUMS

The plum, like a pear, succeeds best in a rather heavy soil with some clay and being generally free from disease is profitable. They should be gathered a few days ahead of use that they may develop their perfect flavor. For family use they especially do well in poultry yards, or where the hogs keep the ground free from fallen fruit. The varieties should be mixed.

With only reasonably good care and culture, Plum trees can be kept in healthy condition, and will produce fine crops of fruits. The market for Plums is never over-stocked, and they always bring good profitable returns.

American Varieties

Gneii (Blue Magnum Bonum, N.Y.)—Medium; bluish purple; cling, flesh yellowish-green; rather coarse; sweet, pleasant flavor; a great market sort. Tree hardy, very vigorous and upright grower. September.

Shropshire (Damson, Eng.)—Small; black in market for kitchen use. Tree is not a or blue; cling; flesh rather coarse, popular rapid grower, but fruit grows abundantly in thick clusters. October.

York State Prune—Large size; blue; delicious; one of the best in quality and most productive of all prunes. Freestone. A vigorous grower and hardy. August.
Domestic Varieties

**Abundance**

*Bradshaw (Niagara, Amer.)*—Medium large; purplish-red; free; flesh green and juicy; good shipping qualities. Tree an upright grower, bears regularly; enormous crops. Medium early.

**Damson (Europe)**—Small; black, with thick blue bloom; free; flesh juicy, but rather tart; best for kitchen and market. Tree enormously productive and hardy. September.

**Green Gage**—Small but of highest excellence; skin greenish yellow; flesh yellow, juicy and of fine flavor. Late September.

**Imperial Gage (N. Y.)**—Medium; yellowish-green; heavy white bloom; free; flesh juicy, sweet, rich and excellent; one of the very best dessert and market. Tree upright and vigorous. September.

**Italian Prune (Europe)**—Medium large; purplish-black; blue bloom; free; flesh greenish-yellow, juicy, sweet and of good quality; will hang on tree after ripening; splendid for drying and market. Tree very productive. September.

**Lombard (N. Y.)**—Medium large; reddish-violet, with heavy bloom; cling; flesh firm, yellow and very pleasant for both kitchen and market. Tree unusually vigorous, succeeding well on even light soils. Late August.

**Yellow Egg (Europe)**—Very large; greenish-yellow; flesh a little coarse but recommended for drying and cooking. Tree a free grower and very productive. Late August.

**Hybrid Varieties**

**Abundance (Japan)**—Medium to large; a rich cherry red; with a decided white bloom; cling; flesh light yellow, exceedingly juicy, tender and delicious; kitchen and market. Tree vigorous and hardy; rapid grower and bears young. Last of July.

**Burbank (Japan)**—Large; reddish-purple; cling; flesh yellow; juicy; good for kitchen and market. Tree rather spreading and abundant bearer; very hardy and prolific. Medium late.

**Red June (Japan)**—Medium; vermilion red with bloom; semi-cling; flesh light lemon yellow; slightly sub-acid; but good quality for kitchen and market. Tree strong and spreading; unusually productive. Early.

**Shipper's Pride**—Large; purple; flesh firm sweet and excellent for shipping and kitchen. Tree hardy and productive. September.

**Wickson (Calif.)**—Very large; reddish-purple with white bloom; cling; flesh firm and meaty; yellow, rich, aromatic; a market sort. Tree strong and spreading; bears abundantly and early in most localities. August.

APRICOTS

**Alexander (Russian)**—Medium to small size; light orange flecked with red; flesh tender, juicy, sweet and good flavor; dessert and market. Tree hardy and productive. July.

**Early Golden**—Small roundish-oval; pale orange with smooth skin; flesh yellow; juicy, sweet and desirable for dessert use. Tree hardy and productive.

**Moorpark**—Very large; orange-yellow with numerous specks and dots; flesh yellow; sweet, juicy and rich; good to very good market and dessert. Tree is rather tender and fruit ripens unevenly. August.

MULBERRIES

**Downing**—Highly ornamental for street or lawn, bearing an abundance of large black, subacid fruit. Its long bearing season makes it a universal favorite wherever it is grown.

**New American**—Equal to Downing in all respects and a much harder tree. It bears fruits of the finest size and flavor from mid-July until Autumn.
While the cherry tree is of rather slow growth it is so sturdy and hearty and bears for so many years a large, bountiful crop under the most adverse conditions, that a few of them are the most valuable tree that a home man can plant. Where room is available a few of the sweet varieties is very desirable, but owing to their uncertain cropping, sour varieties should also be included among the selections. Sweet varieties thrive only in favored localities, also they require particular care and attention, especially in spraying. But the sour cherry can be grown almost anywhere. It makes a fine ornamental windbreak, gives great satisfaction in the home garden, and offers great possibilities for profit for the grower who supplies the local markets.

### Sweet Varieties

**Governor Wood**—Large, round, dark heart-shaped; yellow, mottled with red; flesh sweet, juicy and delicious. Fruit hangs well on tree. June.

**Napoleon**—Yellow, with a bright red cheek; very large; long, heart-shaped; firm flesh. Meaty, crisp, mild and sweet; high quality. Tree is a hardy, vigorous, upright grower, with strong sturdy limbs. Very productive and bears young.

**Schmidt** (Smith’s Bigarreau)—Very large dark reddish-black; flesh dark, tender, very juicy with a fine flavor. Tree vigorous.

**Spanish**—Large, pale yellow with red cheek; flesh firm and juicy. One of the best light colored cherries for dessert. Tree very productive. June.

**Tartarian** (Black Tartarian)—Very large; purplish-black, heart-shaped; flesh mild and sweet and quality considered the very best for market and dessert. Tree is a vigorous, upright grower and immense bearer. July.

**Windsor**—Large, dull red; flesh very firm, and fine quality; good bearer. No cherry in recent years has attracted more attention. Has been recommended by some of the most prominent fruit growers of the country.

### Sour Varieties

**Early Richmond**—Medium size, dark red; sprightly acid flavor. This is one of the most valuable and popular of the acid cherries, and is unsurpassed for cooking purposes. Tree a splendid grower and is exceedingly productive. The most hardy of all varieties. Ripens through June.

**English Morello**—Very dark sour cherry; latest to ripen. One of the best cooking cherries. Dwarf-growing tree. Especially good for garden planting.

**Montmorency** (Large)—Large, round, handsome red; flesh fine flavored, sub-acid; rich. Recommended for kitchen and nearby market. Tree good grower, hardy, productive. Late June.
Grapes are one of the most productive and hardy fruits that we have. They can be grown in small spaces and trained up the sides of buildings or along fences, occupying very little room. Make the soil mellow and plant vines somewhat deeper than they stood in the nursery and about 8 feet apart by a fence or building. As a commercial crop they are as desirable as corn and as staple on the market. When a vineyard is once established it will be very productive for a lifetime with ordinary care. Poor soil should be given a liberal application of rotten manure.

Concord—Large, purplish black grape; very hardy and productive, ripening about the middle of September. This is one of the most popular market grapes.

Catawba—Berries large and round, reddish-coppery colored; flesh fine flavored, sweet. An excellent late sort. Well known as the great wine grape.

Delaware—Berries rather small, round, skin thin, light red, flesh juicy without any hard pulp; sweet and spicy and delicious flavor. Vine moderately vigorous, hardy and productive. Midseason.

Diamond (Moore’s Diamond)—Large, delicate greenish-white with a yellowish tinge when fully ripe; few seeds, almost free from pulp; excellent quality. Vine like Concord in growth and hardiness and foliage; the leading early white grapes.

Niagara—Large, slightly oval; pale yellow with a white bloom; quality equal that of Concord and is the standard white grape of country. Bunches are large and compact. Vine vigorous, hardy and very productive.

Van Bindley—Handsome light red; sweet, tender, good quality. A good keeper and shipper though poor self-pollenizer. Hardy valuable.

Worden—Large, round; black with white bloom; quality very fine; classed as better and sweeter than Concord. Extremely hardy, productive.

Woodruff—Large round; red; handsome; quality very good and recommended for both dessert and market. Vine a strong grower, healthy and hardy. Early midseason.

Asparagus

This delicious and healthful vegetable should be found in every garden. Nothing can be more easily grown and no plant will give so much good, healthful food for so little outlay. Set in the fall or spring.

Conovers—A standard variety of large size, tender.

Palmetto—Plants vigorous in growth, producing large, thick, dark green shoots with a distinctly pointed tip.

Washington—A new rust-resistant pedigreed Asparagus. As a standard variety for the production of fancy Asparagus for the home or market, it stands ahead of all others in size, vigor, tenderness, quality, and rust-resistance.
Raspberries are one of the most delicious and popular fruits grown, are easily cultivated and require little care. Cut out old and weak roots each year. Plant in good soil in hills about 4 feet apart. With a little care and attention they will produce large crops of berries. In large plantings it is advisable to plant them thickly the same as hedge row.

**Black Varieties**

**Cumberland**—The largest of all the black-caps; coal black berries; very firm and the quality of the very best; excellent shipper. Bush is a strong grower, stocky canes and unusually prolific. Midseason.

**Gregg**—Large; black, covered with a bloom; quality excellent for shipping, evaporating and general use. Bush hardy and favorably known in every district; productive. Midseason.

**Kansas**—Very large; black; a berry of splendid quality for general use and popular on the market. In many sections it is the leading sort for extensive planting on account of its vigorous and healthy growth, and prolific bearing. Midseason.

**Cuthbert**—Large sweet and juicy, but firm; very attractive and recommended for all purposes. Matures fruit in short time.

**Plum Farmer**—Large sweet and juicy, but firm; very attractive and recommended for all purposes. Matures fruit in short time.

**Columbian**—Very large; deep purplish-red; sweet and highly flavored; for kitchen and market. Bush very vigorous and a large grower. Needs extra room as it is very productive. Early.

**Cuthbert**—Very large; conical rich crimson; very handsome and firm; flavor sweet, rich and luscious; a great market sort and will stand shipping long distances. Bush hardy, both north and south; stocky, upright grower and productive. Midseason.

**Herbert**—Originated in Canada. Stands severe winters. Fruit large, bright crimson; unsurpassing quality; rich sugary of true raspberry flavor. One of the best market berries.

**Haymaker**—Very large; a bright purplish-red; excellent flavor; delicious for table use and splendid for canning and shopping. Bush vigorous, hardy and free from disease and a good producer. Recommended as profitable.

**King**—Large; crimson; firm; good flavor and desirable for dessert and market; stands shipping excellently. Bush hardy and very productive. Early.

**St. Regis**—Raspberries for four months. The new everlasting variety. It gives a crop of fruit all summer and autumn fruiting on the old canes in generous quantities until late in August. By this date berries begin to ripen on the young canes and continue until late in autumn. Berries are a bright crimson of large size, and of surpassing quality, rich, sugary with full raspberry flavor. It succeeds upon any soil, whether light and sandy or heavy clay and the canes are absolutely hardy.
BLACKBERRIES

We grow our blackberry plants from root-cuttings, and in this way get plants with plenty of fibrous roots, which make sure the growing of the plant. In fruiting patches of blackberries there will spring up many plants from the root, and these are the plants that are usually dug up and sent out to the trade. They have but few, if any, fibrous roots, and are much more apt to die when planted, and will not make the growth after planting that plants will when grown from root-cuttings.

Blower—Claimed to be the hardiest, most productive, the finest quality and for market to bring the highest price of all blackberries. Large size, jet black, good shipper, best quality and unexcelled productivity are the main characteristics of this splendid new sort.

Bldorado—Large; black and do not turn red on exposure to sun; sweet and melting having no hard cores, and a good keeper. Vines hardy and vigorous.

Mersereau—Large, jet black; extra quality, very sweet; without core; unsurpassed as a shipper and keeper. Remarkably strong grower, claimed to be the hardiest blackberry.

Snyder—Medium size, sweet, melting; extremely hardy and wonderfully productive; no hard, sour core; half as many thorns as Lawton or Kittatinny, and nearly straight and short. A good market berry and shipper. Always dependable. Early.

DEWBERRIES

A variety of blackberry that trails on the ground.

Lucretia—Large, jet black, highly flavored and hardy; berries ripen before raspberries are gone, sweet and luscious throughout with no core. The best, most dependable and profitable of all Dewberries grown. The Lucretia Dewberry has received the highest praise from the best horticulturists in the country.

LOGANBERRY

The Loganberry is a hybrid between the raspberry and blackberry. The color is clear dark red. It partakes of the flavor of both the blackberry and the raspberry; very delicious; seeds small, soft and few. Ripens early, just after strawberries.

GOOSEBERRIES

Gooseberries should be planted in good, rich soil and well manured once a year. Pick regularly, thoroughly cutting out all dead-wood and surplus branches. Plant in rows 4 feet to 6 feet apart in row. It is well to mulch heavily in the fall. Plants are hardy, rugged and easily grown.

Chautauqua—Very large; greenish-white; thin skinned, sweet and of the very best quality for kitchen and market. Bush vigorous, hardy and free from mildew. Midseason.
FRUIT DEPARTMENT

Downing—Large; roundish; light green, with distinct veins; skin smooth; flesh soft and juicy and very fine flavored; highly esteemed for home use and market. Bush vigorous and productive. Midseason.

Houghton—Medium; roundish; pale red; tender, sweet, very good, and berries are very deliciously flavored. Very profitable for canning or for catsup. Midseason.

Industry—Very large; red; hairy; fine quality; excellent flavor; extensively planted for market. Bush upright, strong and productive. English sort and somewhat liable to mildew. Early.

Josselyn (Red Jacket)—Large, pale red when ripe; oblong; very highly flavored. Bush a strong, vigorous grower; hardy and a wonderful cropper. Early.

FRUIT

CURRANTS

The currant is one of the most reliable of small fruits. They mature just before raspberries and can be used either raw or cooked. Being hardy, they do not winter kill, are easy of cultivation and require little care. They can be grown in any good garden soil. The market is never over-supplied. Prune out dead weed, and mulch heavily. If currant worms appear dust with hellebore.

Cherry—Very large; red, rather acid; bushes short, erect, stout, vigorous and productive.

Pay—Very large; red; fine flavor; a great market currant; universally praised. Bush a cross between Cherry and Victoria, and very prolific.

London—Rather small; red; excellent for market and kitchen; ships any distance. Bush hardy and is planted extensively in northern climates; retains its foliage; long clusters and productive.

Perfection—Large; upright red; quality very superior; rich, mild, sub-acid. Bush good grower and healthy foliage; long clusters and productive.

White Grape—Large; white; sweet or mild, sub-acid, very good quality and popular for dessert and kitchen and well known in market. Bush low and spreading. Dark green foliage; very productive.

Wilder—Very large; bright red and attractive; a splendid market sort; not so acid as most. Bush very productive; large bunches; ripens rather early; fruit keeps well.

RHUBARB

Myatt's Linneaus—Leaf stalks large, tender, juicy, productive, quite early.

Queen—The extra large, tender stalks are a decided pink color; delicious for canning, cooking; strong grower.

STRAWBERRIES

Strawberries are one of the most common and extensively used varieties of our small fruits and as a commercial proposition are grown in large quantities at very satisfactory profit. Are most fully enjoyed when picked fresh from the vine fully ripe. Growing them presents many problems that makes it an interesting occupation of itself, but it is by no means hard to secure wonderful results. It is a great fruit for large profits on small spaces and deserves the cultivation by every person having ground which can be utilized.

Everbearing varieties are receiving a great deal of attention and berries were being picked in Michigan this year all through the fore part of October. The Everbearing berries should be transplanted each year in order to insure their fruiting, but the extra time and attention is well repaid for by the luscious results.
ILLUSTRATED AND DESCRIPTIVE CATALOGUE

Aroma

—Large; dark red; uniformly roundish, heart-shaped; flesh firm and of very good quality. Stands shipping well; plants vigorous and very productive; blossoms rich in pollen and is good fertilizer for imperfect varieties. Late.

Bederwood—Medium size; light scarlet; rather roundish; flesh red, quality excellent. Recommended for dessert and market. Perfect.

Brandywine—Very large; crimson; flesh and of a peculiarly pleasing flavor; popular on the market. Plants require strong and high culture to get satisfactory results. Perfect. Medium late.

Bubach—Very large; scarlet; flesh moderately firm and of good quality, red clear through. Grown as a market variety all over the country. Vines yield well and are reliable. Imperfect. Midseason.

Corsican—Fruit large, longish heart shaped, good quality; stands shipment well. A good variety. Perfect. Midseason.

Crescent—Medium size; light scarlet; flesh fairly firm and of very good quality. Especially desirable for market. Plants a strong grower and can be relied upon for crop. Especially desirable for sandy soil; over-crowds on rich. Imperfect. Midseason.

Dunlap—Medium size; dark, glossy red with golden seeds; flesh reasonably firm red and of excellent flavor. Highly recommended for all purposes. Productive and hardy. Midseason.

Gandy—Large; light crimson; flesh of firm good quality. Plants vigorous but should be planted on swamp or moist clay soils. Perfect. Late.

Glen Mary—Very large; crimson with prominent seeds; flesh firm and juicy. Recommended for dessert and market; of the very best quality. Plants strong and vigorous, thriving on all kinds of soils. Perfect. Midseason.

Haverland—Large, scarlet or crimson. Plant vigorous grower; resists frosts well and yields good crops. Perfect. Midseason.

Minnesota 303—Large dark red berry. Conical shape, firm and fine flavor. Plants hardy and very productive. It is a very heavy bearer of good size, much larger than the Dunlap. It is one of the best for home use or market

Sample—Late. Large size, excellent quality bright red, very firm, rich. A standard shipping variety; also fine for home use. Fruit of uniform size. Imperfect.

Steven's Late—Large and fine; resembles Gandy; firm and of good quality. Good late variety for market. Perfect.

Wm. Belt—Large and handsome fruit; bright red, dotted with golden yellow seeds; unsurpassed for table use. Perfect. Midseason.

Everbearing Strawberries

Progressive—This new fall bearing variety is a very good one. The new runner plants produce a nice lot of berries of good quality. The berries are not so large as Superb and not so good quality, but they yield well. The fruit of the Progressive is of good size, smooth, of good color and appearance.

Superb—Very large, dark red and glossy; fine quality. It begins to bear in June with immense crops and continues until late in fall. It is one of the heaviest bearers of berries in June as well as a remarkable fall bearer. Will produce a fair crop of fruit the first summer.
MASTODON STRAWBERRIES

This greatest of Everbearing Strawberries was found in Indiana a few years ago and is now being generally planted. Berries are almost double the size of other Everbears and produce a heavy crop both Spring and Fall.
The planting of well selected trees is a duty each land owner owes to himself and posterity, and a duty which should not be delayed, the sooner planted the longer both yourself and the public may enjoy them.

There are several good reasons for planting shade trees; they keep off the intense heat of the summer sun; they afford a cool place where the children can play; they make the place more pleasing and they greatly increase the value of the home.

**NUT TREES**

**ALMONDS**

**Hard Shell**—The tree is very showy when in bloom. The kernels of the nuts are large, plump and sweet. Hardy.

**Soft, or Paper Shell**—Encloses as fine a nut in a soft shell. Needs protection.

**CHESTNUTS**

**American Sweet**—The nuts of this tree form quite an item in our commerce. Although smaller than some other sorts they are sweeter and more delicately flavored. This Chestnut is also a grand timber and ornamental shade tree, spreading, in midsummer, billowy masses of creamy fragrant catkins above its large, deep green leaves, making a most beautiful specimen on the lawn.

**Italian**—The most widely planted and most uniformly successful variety yet cultivated in the United States. The three or more broad thick, handsome nuts in each burr are of extra size and quality. Blight resisting.

**FILBERTS—HAZELNUTS**

The filbert succeeds well on almost all soils, the little trees or bushes bearing early and abundantly.

**English**—Most hardy and generally satisfactory over a wide territory. The nuts are nearly round, rich-flavored and toothsome.

**HICKORY**

**Shellbark**—In flavor and quality of kernel this is generally esteemed the choicest of our native nuts—of all nuts some experts have said. The tree is a handsome stately shade tree with tough white wood of great strength and elasticity, marketable at high prices.

**WALNUTS**

**American Black**—The large, oily nuts are borne in heavy crops. They are much relished by children, and always marketable at a fair price. The tree grows quite fast; its dark rich wood is exceedingly valuable.

**English**—A fine, lofty-growing tree, with handsome, spreading head; produces large crops of thin shelled, delicious nuts which are always in demand at good prices. Not hardy enough for general culture north.

**Siebold's Japan**—Of the finer imported Walnuts this is the species best adapted by its hardy, vigorous habit for general culture in our country. It grows with great vigor, assuming a handsome shape without pruning, and has withstood a temperature of 21 degrees below zero without injury. Its nuts are considerably larger than the common hickory-nut, and are borne in clusters of fifteen to twenty. The shell is a little thicker than that of the English Walnut, which it resembles in a general way; the kernels are meaty, delicate, and can be removed entire. The trees begin to bear when two or three years old.
AILANTHUS—TREE OF HEAVEN
A. Glandulosa—From Japan; a lofty, rapid growing tree, with long, elegant, feathery foliage; free from all diseases and insects. One of the most distinctive of ornamental trees.

ALDER—ALNUS
European or Black—A vigorous and rapid growing tree, leaves dull, dark green, turning to yellow in autumn. Of great value for planting in cold, damp ground.
Smooth (A. Rugosa)—A small tree; very valuable for planting in low, damp ground or along a water side. Flowers in late winter or early spring.

ASH—FRAXINUS
White (F. Americana)—A well known native tree; very straight with broad, round head and dense foliage that is dark green above and light silvery beneath, fading to golden yellow. A beautiful and desirable shade tree.
Flowering Ash (F. Ornus)—A small tree producing white flowers in May or June; dark green, wavy, elliptical leaflets with downy hairs beneath; young branches purple dotted yellow. Very showy.

BEECH—FAGUS
American (F. Americana)—A large, stately tree with smooth, gray bark and a compact, round head. Grows very high and is one of the handsomest for street or lawn.
European (F. Sylvatica)—A large and beautiful tree, with dark green, glossy leaves. Rather more compact and of slower growth than the American. A grand lawn tree.

BIRCH—BETULA
Cut-Leaved Weeping—Its tall, slender, yet vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage presents a combination of attractive characteristics rarely met with in a single tree. Very popular for single lawn specimens or groups of three or four trees; the white bark of trunk and twigs gleaming conspicuously among the darker greens and browns.
European White (Betula Alba)—A beautiful tree with white bark and in age spreading and pendulous branches. Very effective for landscape.
Purple Leaved (B. Atropurpurea)—A vigorous tree with purple leaves contrasting strongly with the beautiful white bark.

CATALPA
Chinese (C. Bungei)—A remarkable dense round headed bush, grafted upon straight, upright stem. Very hardy and effective for lawns or formal gardens.
Hardy (C. Speciosa)—A variety that is being grown in the west for timber as well as posts and shade. Has broad deep green leaves and beautiful large blossoms, making it highly ornamental for lawns or street. Rapid grower.

CHERRY—CERASUS
Double White Flowering—A small tree of garden origin, with double white flowers in great profusion. More beautiful and lasting than the common cherry. Of great service as cut flowers.

CHESTNUT—HORSE—AESCULUS
Common or White Flowering—A handsome tree of regular form with a showy foliage and covered in the spring with panicles of white showy flowers marked with red. As a lawn or shade tree it has no superior.

THE FLOWERING CRAB—MALUS
Flowering Crab (M. Floribunda)—A small tree, native of Japan; leaves bright green and lustrous, fading with tones of yellow and bronze; flowers rose red, produced in great abundance; fruit about the size of a pea.
Bechtol’s Double Flowering Crab (M. Angustifolia)—Tree of medium size covered in the early spring with large beautiful and fragrant flowers of a delicate pink color. One of the finest trees in cultivation.
ORNAMENTAL TREES

ELM—ULMUS

American—A magnificent tree growing 80 to 100 feet high, with drooping, spreading branches. One of the fast growing and grand native trees for lawn or street.

English (U. Campestris)—A large tree with spreading branches, forming a round-topped crown; leaves deep green and hold their color late.

LARCH—LARIX

American or Tamarack—A tall, slender tree that is best at home on wet or damp soil; leaves pale green in tufts, fading and falling in autumn. Cones globular, two-thirds of an inch long.

LINDEN—TILIA

American or Basswood (Tilia Americana)—A large tree forming a broad, round-topped crown. Leaves broadly oval, dark green on top and light beneath, turning yellow in autumn; creamy flowers in summer, and very attractive to the honey bee. A grand tree everywhere.

European (L. Europea)—A native of the Alps with a conical head; is esteemed as a timber variety as well as a graceful landscape and park tree. Only suitable for well drained soils as wet, heavy soils do not insure good growth.

HACKBERRY—CELTIS

American Nettle Tree—A handsome tree with stout spreading branches, forming a round-topped crown, leaves almost like the apple, but more pointed. Fruit resembles a small blackberry. Very desirable for street planting.

MAGNOLIA

Cucumber Tree—A splendid pyramidal tree that grows to a great height, flowers yellowish-white, and fruit resembles a cucumber. A most valuable hardy shade tree.

Sweet or White Bay (M. Glauca)—Slender tree or very large shrub. Leaves oblong, shining green flowers, large, creamy white, fragrant.

MAIDEN HAIR TREE—GINKGO

G. Biloba (Salisburia adiantifolia)—A remarkable tree of spreading growth in age. Deep green, thick leaves similar in shape to those of the maidenhair fern. Rapid grower and very hardy. As a specimen or avenue tree it excels, having a very picturesque outline and retaining its leaves until very late autumn.
MAPLE—ACER

Box Elder or Ash Leaved Maple (A. Negundo)—A rapidly growing tree with spreading branches. Frequently planted as an ornamental, but especially popular as a wind break or for timber because very hardy, withstanding cold and drought.

Norway Maple (A. Platanoides)—A very handsome tree attaining large proportions, its spreading branches form a dense, round head and is especially desirable for street or lawn planting. Has five lobe leaves, bright green, lighter underneath, and smooth on both surfaces, fading to yellow and gold.

Schwedleri (A. Plantanoides)—A beautiful variety with very large bronze red leaves and young shoots of the same color; a vigorous grower and most effective ornamental tree; fifty feet high.

Soft or Silver Leaved (A. Dasycarpum)—A rapid growing tree of large size, irregular rounded form; foliage bright green; for streets and parks; attains about the same height as Norway.

Sugar or Hard (A. Saccharum)—A well known native tree, valuable for the production of sugar and wood; very desirable as an ornamental shade tree.

Weir’s Cut Leaved (A. Lacinatum)—A variety of silver-leafed and one of the most beautiful, with cut or dissected foliage; rapid growth, shoots slender and drooping; ranks among the best as an attractive lawn or shade tree.

MOUNTAIN ASH—SORBUS

American—A small tree with spreading branches, forming a round crown; leaves dark green turning yellow in autumn, flowers white and flat cymes, followed later by showy clusters of bright scarlet berries. Especially adapted to the northern regions.

European—A fine tree with dense and regular head; covered from midsummer to winter with great clusters of bright scarlet berries.

OAKS—QUERCUS

White—The grandest of this genus of our American trees. A spreading towering specie, growing one hundred feet high when fully developed with rugged, massive trunk and branches. The deeply lobed leaves change to dark crimson in the fall. This is the typical Oak tree, and where given room to develop, makes a most imposing spectacle on the lawn.

Pin (Q. Palustris)—A magnificent tree for lawn and street planting. Deep green foliage which changes to a bright scarlet and yellow by autumn; a most shapely and graceful tree, assuming the drooping habit with age.

Red (Q. Rubra) — Makes a tree of great height, eighty to one hundred feet; of large size and rapid growth; leaves dark dull green turning to orange and brown in the autumn; acorns very large; a beautiful tree for park or street.

POPLAR—POPULUS

Bolleana (Bolleana)—Grows 60 to 80 feet. Similar in habit to Lombardy; very emphatic and distinct looking tree; has silvery white foliage.

Balm of Gilead (P. Balsamifera Candicans)—A strong growing spreading native tree; esteemed for its vigor and hardiness; leaves broad and heart-shaped, green above and rusty white below; makes a good street tree and is perhaps the best of the poplars for shade.

Carolina (P. Monilifera)—Pyramidal in form and vigorous in growth; leaves large, glossy,
pale to deep green; valuable for street planting on account of its rapid growth.

Lombardy (P. Fastigiata)—Attains a height of from one hundred to one hundred and fifty feet; well known for its erect rapid growth and tall, spiny form; indispensable tree for landscape gardening or to break the monotony of most other trees.

REDBUD—CERCIS

Judas Tree—A medium sized tree with large irregular head shaped leaves; derives its name, Red Bud, from the profusion of delicate reddish-pink blossoms with which it is covered in early spring before the foliage appears. One of the finest of the ornamental trees.

PERSIMMONS—DIOSPYROS

Persimmons (D. Virginiana)—A native variety with round top and spreading; foliage dark green and very dense; fruit over an inch in diameter, pale orange yellow, with whitish bloom; a beautiful lawn tree. Valuable for ornamental purposes as well as fruit. Succeeds where the Japanese varieties fail. Can be grown wherever peaches will thrive.

SYCAMORE—PLATANUS

American Sycamore or Plane (P. Occidentalis)—A well known tree very common throughout the United States: leaves heart-shaped with small lobes, sharp pointed; branches wide and spreading; a rapid growing and beautiful tree with picturesque white or grey bark.

European Sycamore or Plane (P. Orientalis)—A rapid growing tree, large and massive with a round-topped head; native of India and Europe and has been cultivated from time immemorial; bark whitened; bright green foliage; very hardy and generally preferred to the American for lawns and street.

THORN—CRATAEGUS

Double White Thorn (C. Oxyacantha var. Alba Flore Pleno) —A small tree with spreading spinney branches; very hardy and will thrive in a dry soil; this is the famous May thorn of English gardens and is very beautiful; double white rose blossoms cover the tree when in bloom. Makes splendid hedge plant.

TULIP TREE—LIRIODENDRON

Tulip Tree (L. Tulipfera)—A tall, pyramidal trunk rises to a great height and is clothed with a splendid foliage of large, glossy leaves; large, tulip-shaped flowers are borne in the spring, greenish yellow and orange. One of the most distinguished tall trees.

WILLOW—SALIX

Laurel Leaved (S. Pentandra)—A medium sized tree with compact habits leaves shiny dark green and fragrant when bruised, the odor resembling the Bay tree. One of the best willows for ornamental planting.

Rosemary (S. Incana)—A shrub or small tree with a symmetrical round top; does not grow over eight feet tall; leaves narrow, bright green, silvery white beneath.

Yellow (S. Vitellina)—A large tree with a bright yellow bark; forms a round head, and grows to a very large size. The conspicuous color of the bark gives it a pleasing contrast to the evergreens or other trees in the winter.
WEEPING TREES

ASH—FRAXINUS

European Weeping—The common well known sort; one of the finest lawn and arbor trees, grows rapidly.

BEECH—FAGUS

Weeping—Native of Belgium, fine, vigorous beautiful tree. Attains great size.

BIRCH—BETULA

Cut Leaved Weeping—Trembling, vigorous and hardy. A most beautiful tree with its leaves trembling in the lightest breeze. Its bark glistening from bright foliage and sparkling in the sun.

MULBERRY—MORUS

Tea’s Weeping—A variety of the well-known Russian mulberry. Forms a perfect umbrella-shaped head with long, slender branches which droop to the ground parallel with the stem. Very beautiful and hardy.

WILLOW—SALIX

American Weeping—A dwarf, slender variety; grafted five to six feet high; it makes one of the most ornamental of small weeping trees; very hardy.

ELM—ULMUS

Camperdown Weeping—One of the most distinct and picturesque of all our weeping trees. Grows well in almost any climate; is of fine and notable habit, the strong branches often sweeping out horizontally several feet before they curve downward.

EVERGREENS

Considerable care must be exercised in transplanting evergreens and should never be set in the fall after the growth of other trees has ceased but their beauty and ability as wind breaks will repay the trouble.

ARBORVITAE—THUYA

American (T. Occidentalis)—A beautiful native bright green; yellow green beneath; valuable for screens and hedges.

Globe (T. Globosa)—A dense light green evergreen of dwarf habit, grows naturally found like a ball; one of the best dwarf.

Golden (T. Orientalis Aurea)—Broad bushy grower, with deep golden foliage; ornamental.

Pyramidal (T. Occidentalis, Pyramidalis)—A compact and narrow pyramidal tree; its branches are short and densely clothed with bright green foliage; very formal and attractive and the narrowest and most columnar of arborvitae.

Siberian (T. Occidentalis Siberica)—One of the best of the genus of this country; exceedingly hardy, keeping color well; growth compact and pyramidal; makes an excellent lawn tree.

JUNIPER—JUNIPERUS

Irish (J. Communis Hibernica)—A slender, columnar form with numerous upright branches; invaluable in Italian gardens and whose architectural features are desired; foliage glaucous green.
Red Cedar (J. Virginian)—Always popular and can be used ornamentally in a number of ways thriving well and making a fine appearance in soils or situations where other trees will not grow. Eighty to 100 feet.

Blue Virginia Cedar (Glauca)—A very vigorous variety with silvery-blue foliage. This is one of the most beautiful forms of the red cedar, and makes a splendid specimen tree.

PINE—PINUS

Austrian (P. Austriaca)—A tall tree, with a broad, ovate crown; leaves in pairs, about four inches long, rigid and very dark green; cones two or three inches long of a glossy yellowish-brown color. A fast growing, dense tree of great adaptability.

Bull (P. Ponderosa)—A lofty tree from our western coasts, growing sometimes to 150 feet. Hardy, quick growing with long needles of silvery green.

Scotch (P. Sylvestris)—Dense, broadly pyramidal, fifty to eighty feet high; luxuriant in growth, with strong, erect shoots and silvery needles.

Yellow (P. Echinata)—A tall, handsome tree with slender often perpendicular branches, forming a broad oval crown; leaves in twos and threes, dark green, three to four inches long, dull brown. Splendid for lawn and landscape.

SPRUCE—PICEA

Colorado Blue (P. Pungens)—One of the most beautiful and hardy of all spruces; in form and habits, similar to the white spruce; foliage a rich, light bluish-green.

Douglas (A. Douglasii)—A native of Colorado; large conical form; branches are spreading, horizontal; the leaves light green above silvery white below.

Hemlock (T. Canadensis)—A graceful and beautiful native tree, with drooping branches and delicate dark foliage distinct from all other trees, a handsome lawn tree and it makes an ornamental hedge.

Koster’s Blue Spruce (P. Pungens, var. Kosteriana)—A type of the Colorado blue spruce; foliage silvery-blue, densely crowded on the many branches; very hardy.

Dwarf Norway (P. Excelsa Pygmaea) — Is a low dense bush in which the branches are much shortened and crowned. A peculiar and interesting form.

Black Hills Spruce—Dark green perfectly hardy, very compact, the best for general planting. It is superior to any as a windbreak. Early transplanted. A native of western South Dakota.

SHRUBS

Beautiful effects are to be secured by the proper planting of hardy shrubs and we offer the most splendid selections.
ILLUSTRATED AND DESCRIPTIVE CATALOGUE

AESCULUS

Aesculus (Dwarf Horse Chestnut)—An attractive and hardy shrub which grows from 5 to 6 feet tall. Flowers grow on long spikes and make a showing.

BARBERRY—H. BERBERIS

Barberry—The barberry makes a low dense hedge which will stand any amount of trimming.

Canadian (B. Canadensis)—A native shrub which flowers in May. Handsome foliage; yellow flowers.

Japanese (B. Thunbergii)—Of dwarf habit, small foliage, changing to beautiful coppery-red in the late fall.

DOGWOOD—CORNU S

European Red Dogwood (C. Sanguinea)—Grows 8 to 10 feet high with purplish red branches and leaves marked with white. Blossoms in May and June are greenish-white in flat-topped clusters, followed by bunches of black berries.

Florida (White Flowering Dogwood)—Large shrub or small tree, producing a mass of large white flowers in May before the leaves appear. In the fall the deep, green foliage turns to a brilliant scarlet.

Siberian Dogwood (C. Alba var. Siberica)—Grows 6 to 10 feet tall; dark green foliage, pale on under side. Blossoms in early summer with numerous flat-topped clusters of creamy white, followed by fruit of light blue or bluish-white. Branches blood red, very attractive shrub.

CYDONIA

Japonica (Scarlet Japan Quince)—An old well-known shrub with a profusion of bright scarlet flowers which cover the branches in early spring; small quince-shaped fruit. Makes a fine specimen for the lawn, and is also adapted for hedges. Very hardy.

DESMODIUM

Sweet Pea Shrub (Pendulifrum)—A low growing shrub whose top dies down in the fall, but comes up again in the spring when it makes a valuable border, blooming in September.

DEUTZIA

Gracilis—Six to 8 feet high with numerous upright branches, rough, dull green leaves; blossoms in June with double pure white flowers in erect panicles 2 to 4 inches long.

Crenata—Similar to the preceding except that the outer row of petals are a rosy purple. Very showy.

Pride of Rochester—Six to 8 feet high, blooms in early spring with extra large, double white flowers. A distinct and valuable variety.

ELAEAGNUS—OLEASTER

Russian Olive (E. Angustifolia)—Eight to 12 feet high. Very hardy and prospers in almost all well-drained soils. The foliage is very handsome, willow-like and of a rich, silvery white. Blossoms in June with small yellow flowers, followed by yellow fruit.

Silver Thorn (E. Longipes)—Five to 8 feet high, of bushy habits. Foliage dark green above, with silver beneath; very showy. Blossoms in April or May; are creamy white, followed by edible fruit, delicious for sauces. Fruit ripens in July.

EUONYMUS

Burning Bush, Winged (E. Alatus)—Six to 8 feet high, with corky winged branches. Foliage bright green, fading in autumn to gorgeous tones of red and crimson.

Strawberry Bush (E. Americanus)—Five to 8 feet tall. Erect with slender green branches. Foliage bright green with very rose colored warty fruit.
ORNAMENTAL SHRUBS

FORSYTHIA

Hybrid Golden Bell—Eight to 10 feet high with slender, arching branches. Foliage lustrous dark green; blooms very early in the spring; often before the snow is off the ground. One of the most showy shrubs in cultivation.

HIBISCUS SYRICACUS

Althea, Rose of Sharon—Eight to ten feet high, resembling small flowering tree; planted closely together they make a good flowering hedge. Blossoms late in the fall. A number of colors.

HYDRANGEA

Hardy (H. Paniculata Grandiflora)—A beautiful, tall shrub; foliage of bright shiny green; the flowers are borne in August and September in huge panicles from 8 to 12 inches long. Beautiful as a border or can be grown in tree form.

Tree Hydrangea—Tree form of the above.

Arborescens Alba Grandiflora—Resembles the Paniculata in general form and shape of flowers; borne in panicles of pyramidal shape from 5 to 8 inches in diameter and 8 to 10 inches long. White.

LILAC—SYRINGA

Common Lilac—Up to 25 feet in height; dense panicles of flowers of the most delicious fragrance.

Double Lilac—Are more dwarf than the single flower kinds; the flowers last longer but do not bloom so profusely.

Charles X—Rich, reddish purple flowers, luxuriant glossy foliage and a rapid grower.

Ludwig Spaeth—Flowers strikingly hand-some and of enormous size. A deep rich wine color—fine.

Marie Legraye—Beautiful creamy white flowers of enormous size, dwarf habit; one of the most popular; single.

President Grevy—A magnificent clear blue lilac, very double and large. Best of the blue sorts.

LONICERA

Fragrant Bush Honeysuckle (L. Fragrantissima)—Six to 8 feet high, with numerous spreading branches; foliage bright green; flowers white or light yellow; very fragrant.

Japanese Bush Honeysuckle (L. Morrowi)—Four to 6 feet high with spreading branches; dark green with light underside. Blooms very early in the spring.

Tartarian Honeysuckle (L. Tartarica)—Eight to 10 feet high with numerous branches; bright green; blossoms in late spring with white or pink flowers.

PRIVET—LIGUSTRUM

Amoor River Privet (L. Amurense)—A valuable ornamental shrub for hedges and borders.

California Privet (L. ovalifolium)—The well-known variety; vigorous and hardy; deep glossy green; useful for hedges and borders.

Ibota (Japanese Privet)—Large glossy, distinct foliage; fragrant white flowers produced in great profusion. Excellent hedge plant.

Polish—A compact erect growing shrub with bluish green lustrous foliage which is persistent until midwinter, and keeps its color; white flowers in panicles followed by black berries; very hardy and amenable to clipping.
RHUS

Fragrant Sumac—Two to four feet high with branching habits; foliage bright green, fading to scarlet in autumn; blossoms in June, with yellow flowers.

Purple Fringe or Smoke Tree—Ten to 12 feet high with spreading branches; foliage green, changing to brilliant red and yellow in autumn; the blossoms take the form of very bright mistlike flowers, having the appearance of smoke at a little distance, and last during mid-summer.

RIBES

FloweringCurrant (R. Aureum)—Five to 6 feet high with upright branches; foliage lustrous green; blossoms in early spring with large and showy yellow flowers.

SAMBUCUS

American Elder (S. Canadensis)—Six to 10 feet, upright habit, the stems filled with white pith.

Golden Elder (S. Nigra Aurea)—Six to 15 feet; similar to the American except the foliage is an attractive golden color.

SPIREA

Anthony Waterer—An elegant dwarf shrub, blooms all season; flowers deep crimson.

Bridal Wreath—Five to 7 feet tall; foliage glossy green, orange in autumn; blossoms cover the entire length of the graceful, arching branches.

Opulifolia (Nine-Bark, Opulaster)—Ornamental, bright foliage and double white flowers in June. Showy.

Thunbergii—Three to 5 feet high with numerous slender branches, forming a dense featherly bush. Blossoms in early spring with pure white flowers which cover it like a mantle of snow.

Van Houttei—Five to 6 feet high with numerous spreading branches; foliage upright habits; blossoms in May with lustrous green; blossoms in early spring with large and showy flowers followed by dark brown or black edible berries.

Syringa—Philladelphus

Common Mock Orange or Syringa—Eight to 10 feet high with upright or arching branches; foliage bright green; blossoms in May with great quantities of creamy white flowers.

Gordon’s Syringa (Gordonianus)—A handsome shrub having a profusion of white flowers in early summer.

Lemoinei Erectus—Upright grower; covered with fragrant white flowers; superb shrub.

WEIGELIA—DIERVILLA

Diervilla Floribunda—Six to 8 feet high, with numerous upright branches. Foliage dark green, blossoms in June with brownish-crimson buds which change to bright carmine.

Rosea (D. Florida)—About six feet high, with spreading habit; dark green foliage, blooming profusely with large, rose colored flowers.

Able Carrier—Rose carmine with yellow spot in throat.

Eva Rathke—Dark carmine.

Van Houttei—Clear carmine.

VIBURNUM

Common Snowball—Six to 10 feet high, numerous upright stems; blossoms in the spring with globular clusters in great profusion.

Japan Snowball—Six to 8 feet high; vigorous, with spreading branches; foliage dark green with bronze margins; blossoms in the spring. Better habits; preferred to the old variety.
ORNAMENTAL SHRUBS

AMPELOPSIS

**American Ivy or Virginia Creeper**—The well-known native vine with five-parted leaves that change to rich crimson in autumn; berries are blue black. Very rapid grower and entirely hardy. One of the finest for covering walls, verandas or trunks of trees.

**Boston Ivy** (A. Veitchii)—A beautiful hardy Japanese species. Leaves overlap one another, forming a dense sheet of green. It grows rapidly and clings firmly to the smoothest surface with the tenacity of Ivy; the foliage is very handsome in summer and changes to scarlet in autumn. The most popular climbing plant for covering brick, stone or wooden walls, trees, etc.

EUONYMUS

**Evergreen Vine** (E. Radicans)—One of the finest evergreen vines with small rich green foliage and pink fruits in cells which separate and expose the scarlet arils covering the seeds, making a most attractive feature. It is a treasure. Used for vases, baskets and borders of beds.

CLEMATIS

**Sweet Scented Japan Clematis** (C. Paniculata) —Flowers are pure white, medium size, fragrant and borne in immense sheets in September. Foliage is clean and glossy of from 25 to 30 feet in a single season and should be cut back to the ground each spring.

**Virgin’s Bower** (C. Virginiana)—A remarkably rapid climbing plant, growing to the height of 20 feet, producing an immense profusion of flowers in August.

ARISTOLOCHIA

**Dutchman’s Pipe** (A. Sipho)—A magnificent native vine of climbing habit and rapid growth, with magnificent light green foliage 10 to 12 inches in diameter and curious pipe shaped, yellowish brown flowers; grows well in shade.

**LONICERA**

**Honeysuckle; Hall’s** (Lonicera Halliana) — Blooms all summer, flowers yellow and white almost evergreen.

**Japan Golden Leaved Honeysuckle** — A handsome and desirable variety. Flowers are creamy white and form festoons and masses.

**WISTARIA**

**Chinese Wistaria** (W. Sinensis)—One of the most elegant and rapid growing of all climbing plants; attains an immense size growing at the rate of 15 to 20 feet in a season. Has long pendulous clusters of pale blue flowers in May and June, and in autumn.

**Japanese Wistaria** (W. Multijuga)—A Japanese species with dark blue flowers.
Roses thrive best in a medium light clay soil. Before planting prepare the soil by spading and thoroughly working over to a depth of about 18 inches, fill in well-rotted stable manure while spading and work it carefully into the soil. After the plants are set, for best results cut all branches back to within 3 or 4 inches of the top of the ground. The new growth coming out will make a much nicer head than if the plant were not pruned, and the bushes will bloom all the better.

**Hybrid Perpetuals**

**American Beauty**—Deep pink, shaded with carmine, large, globular, delicious odor desirable for forcing; not to be chosen for out doors growing.

**Anna de Diesbach**—Beautiful shade of carmine; large and showy, flowers slightly cupped, particularly fine in bud. A vigorous grower, quite hardy; a good forcing rose.

**Earl of Dufferin**—Rich crimson maroon with dark velvety shadings. Flowers are large, full, globe-shaped. Thick petaled and very fragrant. Grows well and blooms freely, with many handsome buds in autumn. One of the finest dark roses.

**Frau Karl Druschi**—Snow white, very large, perfect form. A vigorous grower and free bloomer. Bright, heavy foliage and strong upright growth; flowers borne on long fine stems.

**General Jacqueminot**—Brilliant velvety crimson, large and extremely effective. A famous bud and forcing rose quite as well adapted for garden culture. Very fragrant and one of the most popular sorts grown.

**Hugh Dickson**—Deep crimson, shaded scarlet; large; full; perfect form; petals smooth, slightly cupped and reflex; very fragrant; free and continuous bloomer. One of the best autumn Roses.

**Magna Charta**—Clear, rosy, red beautifully flushed with violet crimson; sweet fragrance.

**Margaret Dickson**—A large and handsome winter rose of vigorous growth and magnificent form; petals very large shell-

**Mrs. J. H. Laing**—The color is a soft and delicate shade of pink; the flower is large, well formed, very fragrant and produced on good stems. The buds are long and pointed and extremely pretty. For outdoor planting this is one of the best roses introduced in many years. It blooms continuously in the open ground and is also valuable for forcing, the buds selling at high prices.

**Paul Neyron**—The largest rose in cultivation, sometimes called the peony rose; color bright cerise red. Often produces blooms five inches in diameter. Very fragrant. The plant makes a strong, healthy growth and has clean, glossy foliage. It blooms almost without intermission from June until late October.

**Ulrich Brunner**—Bright cherry-red, very attractive; flowers of fine, form carried well upon the plant; petals of great substance; plant hardy, vigorous, and resists mildew.

**Duke of Edinburg**—Brilliant crimson scarlet shaded with maroon.

**Hybrid Tea Roses**

**American Beauty**—Deep pink, shaded with carmine, large, globular, delicious odor desirable for forcing; not to be chosen for out doors growing.

**Anna de Diesbach**—Beautiful shade of carmine; large and showy, flowers slightly cupped, particularly fine in bud. A vigorous grower, quite hardy; a good forcing rose.

**Earl of Dufferin**—Rich crimson maroon with dark velvety shadings. Flowers are large, full, globe-shaped. Thick petaled and very fragrant. Grows well and blooms freely, with many handsome buds in autumn. One of the finest dark roses.

**Frau Karl Druschi**—Snow white, very large, perfect form. A vigorous grower and free bloomer. Bright, heavy foliage and strong upright growth; flowers borne on long fine stems.

**General Jacqueminot**—Brilliant velvety crimson, large and extremely effective. A famous bud and forcing rose quite as well adapted for garden culture. Very fragrant and one of the most popular sorts grown.

**Hugh Dickson**—Deep crimson, shaded scarlet; large; full; perfect form; petals smooth, slightly cupped and reflex; very fragrant; free and continuous bloomer. One of the best autumn Roses.

**Magna Charta**—Clear, rosy, red beautifully flushed with violet crimson; sweet fragrance.

**Margaret Dickson**—A large and handsome winter rose of vigorous growth and magnificent form; petals very large shell-
Columbia—(Hill, 1918). Peach-blow pink, deepening as it opens to a glowing and enduring color, resembling a perfect Shawyer rather than the other parent, Ophelia. A large Rose with long, stiff stems, nearly thornless; absolutely free from mildew and an easy doer. Ophelia X Shawyer.

Étoile de France—(Pernet-Ducher, 1904). A brilliant shade of clear red-crimson velvet, centering to vivid cerise; large flowers on long, stiff stems; remarkably vigorous, free-blooming and hardy, with bronzy-green foliage.

General McArthur—(Hill, 1905). Vivid crimson-scarlet, the most beautiful shade of any garden or forcing Rose offered, retaining its brilliancy when expanded to flowers of superb form, larger than Liberty or Meteor; free from mildew.

Golden Emblem—Beautifully formed long buds opening up into fine fragrant, golden flowers surpassing even the loveliness of the old Marechal Neil. The color is rich, a yellow cadmium toning to sunflower yellow. This variety is a splendid yard and garden type, blooming profusely and very continuously throughout the season.

Gruss an Teplitz—Bright scarlet, shading to velvet-crimson; fragrant; free grower and most profuse bloomer; lovely foliage. This variety is especially valuable for bedding purposes.

Kaiserin Augusta Victoria—Creamy white and sweetly fragrant; buds are large and pointed and flowers very full and large. Very hardy and continuous bloomer.

Killarney—Noted for its freedom of bloom and the large size of its intensely fragrant flowers. Buds are large, long, and pointed. Color flesh, shaded white, suffused pale pink.

LaPrance—Flowers a delicate silvery rose often silvery pink with peach shading; very large, very double and of superb form. The sweetest and most useful of all roses; flowers continually throughout the season and is deservedly a favorite with many rose growers.

Lady Hillingdon—(Lowe & Shawyer, 1910). Deep apricot-yellow to orange; long, pointed buds; a very free-flowering forcing, and a striking decorative Rose. Awarded gold medal of National Rose Society.

Madame Butterfly—(Hill, 1920). The "Glorified Ophelia," a sport producing more and better growth, more blooms and more petals to the bloom than its parent, with colors intensified, a harmony of bright pink suffused with apricot and gold. The tight buds are a lovely shade of Indian red, yellow at base. Unique for corsage and low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color and of delicious fragrance.

Mad. Edouard Herriot—Its flowers are medium sized, semi-double, well set amid varnished bronze-green foliage. The color is a glorious conglomeration of terra cotta, bronze. Geranium red and dull copper; fine long, pointed beds of coral-red and yellow.

Mistress Aaron Ward—(Pernet-Ducher, 1907). A most striking color—Indian-yellow shading to lemon-cream at edges of petals. Very large and full, of refined form, cupped and very deep, effectively showing the golden heart. A splendid garden Rose and a valuable addition to the forcing class.

Radiance—Extra hardy, vigorous and prolific; one of the best all-around garden roses. Its color is a beautiful blending of carmine rose with shades of opal and copper.

Red Radiance—(Gude, 1916). A bright, cheerful and even shade of pure red; size, foliage, growth and habit same as in the parent "Radiance"; a splendid forcer as well as an admirable nursery Rose. Ours is the true Washington sport.
Crimson Rambler

Souv. de Claudius Pernet—One of the most reliable and strongest yellow roses ever introduced, a decided and unstained sunflower yellow even deeper toned at center. Unlike most yellows, the weather and exposure have little effect upon its pigments; the matured flower gleaming as richly as when first unfolding. Its flower form is large, and full with elongated petals; the buds long and pointed. In growth it is vigorous, erect and branching, with brilliant foliage and almost thornless stems.

Sunburst—(Pernet-Ducher, 1912). Orange-copper or golden-orange and golden-yellow, all intense shades, giving an extremely brilliant effect. A giant Rose, long stems, long pointed buds vigorous, free and healthy, with splendid keeping qualities as a forcer and also an excellent bedder.

Willowmere—A robust garden Rose of bushy habit, with beautiful buds, very large flowers and lustrous green foliage. Color rich shrimp pink, shaded yellow at center and toning to cream pink towards base of petals.

Miscellaneous Roses

Crimson Baby Rambler—Crimson flowers in broad clusters, like those of the Crimson Rambler; a compact bush about two feet high. One of the finest bedding roses ever introduced.

Pink Baby Rambler—This has all the characteristics of the Crimson, but is loaded with great clusters of bright pink roses.

Rugosa Roses

Rosa Rugosa Alba—Pure white, single, having five petals and highly scented.

Rosa Rugosa Rubra—Bright rosy crimson, single, succeeded by large, brilliant berries of much beauty.

Climbing Roses

Climbing American Beauty—Rose crimson almost identical with its parent, the American Beauty, and with rare fragrance; strong habit of growth.

Rosarie—(Witterstaetter, 1917). True cerise-pink; good grower and producer; sport from "Tausendschoen."

Thousand Beauty Rose—A new climbing rose, producing on the same bush so many different colored flowers that it is impossible to describe the variations, hence the very fitting name. Blooming profusely from the beginning of June until last of July. Colors run from tender rose to bright rose and carmine with white and yellow tints showing; a strong grower and hardy.

Rambler Roses

Crimson—The famous crimson clustered climber, so extremely effective when grown on pillars and trellis. The flowers are grown in pyramidal panicles, each carrying thirty to one hundred blooms and over; the individual flowers are from one to one and one-half inches in diameter and remain in perfect condition a long time.

Dorothy Perkins—Clear, shell-pink flowers borne in large clusters of twenty-five to thirty, sweetly scented, full and double with crinkled petals. Foliage stays on a long time.

Paul's Scarlet Climber—(Paul, 1916). Vivid scarlet, shaded crimson, non-fading; semi-double flowers of medium size in large trusses produced in great profusion during an exceptionally long blooming period. Vigorous and free-branching habit with large healthy foliage. Cory Cup 1915, as best new British climber; also Gold Medal, N. R. S.
Philadelphus—Flowers deep rich crimson, more intense than the Crimson Rambler, with larger trusses of flowers which are perfectly double; the color does not fade and the clusters completely cover the bush. Vine is a very hardy and strong grower.

Yellow Rambler—A clear decided yellow, flowers of medium size in immense clusters, very sweet scented; hardest of all yellow climbing roses. It is a rampant grower, well established plants often making a growth of ten to twelve feet in a season.

Bulbs and Roots for Spring

For wealth of bloom in return for a minimum amount of care, the summer flowering bulb and root plants will always be in the front rank. Charming new sorts are being added each year and one need not lack for variety. invaluable alike for bedding, borders or for cut flower use.

**CALADIUM**

Elephant’s Ear—Tropical foliage plant, effective grown as specimen plant or groups on lawn; leaves smooth, light green and very large.

**CANNAS**

Austria—A fine variety of the orchid-flowered type; large, handsome foliage; canary-yellow, with faint scarlet dots on inner petals.

Black Beauty—Small, red bloom; rich bronze foliage. Best of all the red-leaved sorts. 6 ft.

Eureka—The best white. The large substantial flowers are very freely produced on vigorous upright stalks. 4½ ft.

Florence Vaughan—Flowers of the most brilliant golden yellow, dotted with brightest scarlet. 4½ ft.

King Humbert—Foliage is rich bronze and the flower is almost as large as the orchid Canna, often measuring 5 to 6 inches across. In color it is a glowing scarlet often streaked with gold. 3-5 ft.

Mrs. Alfred Conard—Most popular; large, exquisitely shaded salmon-pink flowers freely produced; strong growing. 4 ft.

**DAHLIAS**

A. D. Livoni—Show. A beautiful soft pink; well formed, ball-shaped flowers on long stems; each petal is very tightly quilled and arranged in exact irregularity. Fine flowering.

Countess of Lonsdale—An old and very popular variety. Longest season and freest bloomer of any other cactus type. Deep salmon-red.

Delice—The finest and brightest pink decorative dahlia in existence. Flowers good size, standing well above the foliage. A charming bright pink suffused with lavender. Fine for cutting.

Dr. Peary—Fine dark peony-flowered dahlia. A rich, velvety wine-crimson or dark mahogany. Very large size.
ILLUSTRATED AND DESCRIPTIVE CATALOGUE

PEONIES

Couronne d’Or—White with ring of yellow and crimson splashes. Very valuable variety for dependability and size; a true “crown of gold.”

Delicatesse—Lilac rose color; long used in cut flower trade; very dependable and strong; makes fine showing.

Duchesse de Nemours—Pure white superb cup-shaped flowers; beautiful in bud state; several days after Festiva Maxima.

Edulis Superba—One of the large, strong, best early pinks; very fragrant.

Felix Crousse—The leading red; late; fine form; fragrant; every garden should have this variety.

Festiva Maxima—Very large; pure white with crimson marks; loose petalage, very early; should be in every garden.

Golden Harvest—Creamy pink; very large and fragrant; midseason.

Jeanne d’Arc—Exquisitely scented, large flower; Lilac-pink guards and tufted center; body soft yellow.

Lady Iris—Rose type; late midseason; the cleanest possible color; white suffused with blue. The shadings and color remind one of the beautiful dainty lavender pink; has long and broad, rich, silky petals growing smaller toward the center.

Louis Van Houtte—Fine velvety cerise red, very brilliant.

Mons. Jules Elie—Glossy lilac-pink; enormous flowers; early midseason; a grand peony.

Madame Forel—Large, fine shaped bloom, glossy, ash-colored pink with a silvery tipped center; fragrant; very double and compact; late. A quite desirable variety.

Dahlias—Continued

Le Grand Manitou—Decorative. Pure white, artistically striped, splashed and blotched, deep violet purple.

Maud Adams—Pure, snowy white, very effectively overlaid clear delicate pink. Perfect in every way. One of the best of the show type.

GLADIOLUS

Lily like blossoms on sturdy stems, opening in succession, beautiful as orchids. Finest and most popular of bulbs for spring planting. Choice varieties in white, yellow, red, pink and blue.

IRIS

Celeste—Stands and falls light celestial blue; flowers extra large.

Flavescens—Delicate light yellow, shading to white, edged with gold.

Florentina Alba—Soft, silvery white with orange beard; very fragrant.

Her Majesty—Standards and falls of a bright mauve. Very beautiful.

Honorable—Standards golden yellow; falls rich mahogany-brown; beautiful.

Pallida Dalmatica—Very fine, of strong vigorous habit; flowers large; standards lavender; falls lavender shaded blue.

Queen of May—Pleasing soft, rosy lilac; large flowers.

Japanese Irises—An interesting type with 3 to 6 petals. They succeed in almost any soil or position, but like rich soil and plenty of water.

Queen of May—Pleasing soft, rosy lilac; large flowers.

Japanese Irises—An interesting type with 3 to 6 petals. They succeed in almost any soil or position, but like rich soil and plenty of water.
Hardy Perennials

Achillea (Boule de Neige)—Perfect white flowers all summer; an improved form of the old popular “Pearl.” 15 in.

Anemone (Japanese Windflower)—Fine white flowers, single with yellow stamens, graceful and decorative.

Aquilegia (Columbine) — Old favorite spring and early summer flowering plants that succeed in any ordinary garden soil. We have a selection of red and yellow, yellow, white, blue and white, and violet varieties, long spurred, short spurred or double.

Asters (Michaelmas Daisies)—These are among the showiest of our late-flowering hardy plants, giving a wealth of bloom when most other flowers are gone. Blues, violets and white. Sept.-Oct. 2½-4 ft.

Boltonia (False Chamomile)—Among the showiest of our native perennial plants with large, single aster-like flowers; blooms in summer and autumn months; white and pink. 4-7 ft.

Campanula Medium (Canterbury Bells)—An old-time favorite; shades of pink, purple and white. June-July. 2-3 ft.

Chrysanthemums (Pompon) — Beautiful hardy sorts, indispensable in the hardy border. Their bright colors give life to the garden when other plants have been destroyed by frost.

Coreopsis, Lanceolata (Tick Seed)—The flowers are a rich golden yellow of graceful form and invaluable for cutting; blooms throughout summer and autumn. 2-3 ft.

Daisy, Shasta (Chrysanthemum) — Large snowy-white flowers 4 inches across; in bloom all summer; a good cut flower variety.

Delphiniums (Hardy Larkspur)—These are deservedly one of the most popular subjects in the hardy border; long flower sprays in all shades of blue.

Dianthus (Sweet William) — Various colored flowers in flat clusters; June-frost; 2-3 ft.

Digitalis (Foxglove) — Old-fashioned, dignified and stately during their period of flowering, dominating the whole garden. Bold masses of leaves and flower spikes. White, purple and rose flowers. June-July. 2-3 ft.

Funkia (Plantain Lily)—Is among the easiest plants to cultivate. Their broad, massive foliage makes them attractive subjects for the border even when not in bloom; blue, lilac and white. August-October. 10 in.

Helianthus (Hardy Sunflowers)—The perennial sunflowers are among the most effective hardy plants for large borders; invaluable for decorative purposes or as cut flowers. September-October. 3-7 ft.

Hibiscus (Mallow) — Desirable border plants with large foliage and large showy flowers of delicate coloring, produced during the entire summer; crimson, rose pink, orange, white, etc.

Helenium—Desirable border plants, broad flower heads, yellow, red or orange.

Heuchera—Most desirable dwarf, compact bushy plants of robust constitution and easy culture, growing 1½ to 2 feet high, and bearing during July and August loose, graceful spikes of carol red or white flowers in the greatest profusion.
Hardy English Daisy—Dwarf plants entirely covered with small double daisies in pink or white; lovely for carpeting edge of borders.

Liatris—Showy and attractive native plants, succeeding anywhere, producing large spikes of light rosy-purple flowers in July and August; 5 ft.

Linum—A desirable plant for the rockery and border, growing 1 1/2 feet high, with light graceful foliage and large blue flowers all summer.

Lupinus—Effective plants, bearing large spikes of flowers in May and June; blue white and pink.

Lychnis—Of easy culture, thriving in any soil and this in addition to their brightness makes them general favorites.

Lythrum Roseum Superbum—Rose Loose-strife—A very attractive plant; tall and bushy, throwing up flower-spikes from 1 to 2 feet in length, bearing myriads of rosy purple flowers; in bloom from June to October. 4 feet.

Myosotis (Forget-Me-Not)—Delightful plant, hardly ever out of flower; useful in any shady spot in borders; blue. A general favorite for cutting.

Papaver—Oriental Poppies are among the most brilliant of our hardy flowers. Fern-like foliage, sturdy stems bearing aloft large cup shaped flowers in crimson, orange scarlet and salmon pink with a mass of blue black stamens in the center of each.

Physostegia—One of the most beautiful of our midsummer flowering perennials, forming dense bushes 4 to 6 feet high, bearing spikes of delicate tubular flowers not unlike a gigantic feather; pink and white. Excellent for cutting.

Platycodon (Balloon Flower)—Form neat branched bushes of upright habit, continuous succession of white or blue flowers; June-October. 2 ft.

Pyrethrum—Graceful daisy-like blossoms on long swaying stems. Colors range from deep red through various shades of rose to pure white. Attractive fern-like foliage makes plant effective all season.

Veronica

Rudbeckia (Golden Glow)—Greatly popular; produces masses of double golden-yellow Dahlia-like flowers. July-September. 4-6 ft.

Stokesia (Stokes Aster)—Beautiful native hardy plant; lavender-blue or white; cornflower-like blossoms 4 to 5 inches across, July-October. 18-24 in.

Veronica (Speedwell)—Pretty blue, rose white flowers produced on long spikes, July-September. 1-2 ft.

Yucca Filamentosa (Adam’s Needle)—Finest hardy ornamental foliage and flowering plants; branched spikes of large, fragrant, drooping white flowers; half evergreen. June-July. 4-6 ft.

PHLOX

The ease with which they are cultivated, season of blooming, combined with the varied and beautiful coloring make them particularly valuable for garden planting. In bloom from June till late autumn. Phlox are very effective either as single specimens, in small groups, or large beds on the lawn.

Bridesmaid—Pure white with crimson-carmine eye.

Champs Elysees—Bright rosy-magenta; very effective.

Elizabeth Campbell—Bright and salmon-pink with lighter shadings and dark crimson eye.

Mrs. Jenkins—The best all around pure white.

Miss Lingard—Waxy white with lavender eye; longest spike of any Phlox.

Edgar Quinet—Deep red; very fine in every way.

Sunset—Beautiful, deep pink.

Rheinlander—A most beautiful Salmon-pink. Flowers and trusses of immense size.

Rynstrom—Effective Carmine rose. Vigorous grower and profuse bloomer.

#### BORDEAUX MIXTURE

<table>
<thead>
<tr>
<th>Copper Sulphate</th>
<th>6 pounds</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quicklime</td>
<td>4 pounds</td>
</tr>
<tr>
<td>Water</td>
<td>45 gallons</td>
</tr>
</tbody>
</table>

To destroy leaf-cutting insects, add four ounces of Paris green. For peach, use three pounds each of copper sulphate and lime, and three ounces of Paris green, on account of tenderness.

We recommend crude petroleum, 20 to 25 per cent, with water, for apples, pears, plums, etc., and whale-oil soap, full strength and quality for peaches.

#### KEROSENE EMULSION

<table>
<thead>
<tr>
<th>Hard Soap</th>
<th>½ pound</th>
</tr>
</thead>
<tbody>
<tr>
<td>Boiling Water</td>
<td>1 gallon</td>
</tr>
<tr>
<td>Kerosene</td>
<td>2 gallons</td>
</tr>
</tbody>
</table>

#### ARSENATE OF LEAD

<table>
<thead>
<tr>
<th>Arsenate of Lead, 1 lb.</th>
<th>Water, 150 gallons</th>
</tr>
</thead>
</table>

#### AMMONIACAL COPPER CARBONATE

<table>
<thead>
<tr>
<th>Copper Carbonate</th>
<th>5 ounces</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ammonia</td>
<td>2 quarts</td>
</tr>
<tr>
<td>Water</td>
<td>50 gallons</td>
</tr>
</tbody>
</table>

The Copper Sulphate is best dissolved in large bottles, where it will keep indefinitely, as it should be dikted with water as required. For the same purpose as Bordeaux.

#### COPPER SULPHATE SOLUTION

<table>
<thead>
<tr>
<th>Copper Sulphate, 1 lb.</th>
<th>Water, 25 gals.</th>
</tr>
</thead>
</table>

This should be used only before the foliage appears. It is easily applied, and acts as a general germicide and disinfectant. In simple solution copper sulphate is very injurious to foliage. When lime is added, as in making Bordeaux mixture, its corrosive action is neutralized and injury to the foliage prevented. It adheres to the foliage better by the agency of lime.

#### TOBACCO

Boil Tobacco-stems and use at the rate of two gallons to each pound of stems, for sucking insects.
